

ARE YOU PURSUING MAGNET® STATUS?

The American Nurses Credentialing Center Magnet Recognition Program® recognizes organizations that achieve excellence in nursing practice and superior patient care. Whether you are pursuing redesignation or applying for the first time, your hospital must establish new ways of achieving high-quality, effective, and efficient care.

In support of your hospital's Magnet application, Spok can help you demonstrate innovation with new technology that advances the quality of your patient care and services. Our experts can help you in a number of ways. For more information, visit the [Spok Magnet webpage](#).

PATIENT SATISFACTION

Increase patient satisfaction by improving nurse-call communication and response times, and by promoting quieter environments. [Read the case study on how Children's Hospital Colorado](#) minimized noise throughout the hospital and improved patient care and satisfaction.

PATIENT SAFETY

Reduce patient falls by routing bed alarms directly to nearby nurses. [This eBrief](#) will review three common nursing workflows that can be simplified with mobile communications.

JOB SATISFACTION

Improve nurse job satisfaction and decrease turnover through alarm fatigue reduction and better communication with colleagues. In this webinar, Dr. Nat'e Guyton, RN, MSN, CPHIMS, NE-BC shares how Spok can help you [innovate with new technology](#) to improve the quality of care.

ALARM FATIGUE

Reduce alarm fatigue by routing actionable alarms to the correct responder. In this datasheet you'll find [two examples](#) of workflows where technology can help manage alarms and save time for providers

FURTHER INFORMATION

[Discover](#) how Spok can help you innovate with new technology by developing innovative processes that improve the effectiveness and efficiency of care services, and of interprofessional collaboration to ensure that care is well coordinated.
