

A Mobility Solution for Healthcare

Versity clinical smartphone

Empowering caregivers at the point of care

Spectralink's Versity smartphone meets your toughest clinical requirements without compromising style, flexibility or performance.

Clinical mobility has rapidly evolved as an essential communication tool for care team members.

However, finding the right device that can do it all has been difficult, if not impossible—until now!

Our line of clinical solutions give your staff access to the data, teams and tools they need to improve patient care and outcomes.

These solutions are built to address your organization's specific mobility goals and requirements, combining:

- Best-in-class mobile call quality
- Data security
- Application integration
- Slim, lightweight yet durable design

Versity, a next-generation solution that delivers on every front with streamlined workflows and secure communications for your healthcare facility.

FEATURES

Most dependable, highest quality Wi-Fi voice connections using Spectralink Voice Quality Optimization (VQO) technology

Wireless connectivity for in-building roaming and LTE for outside the building

Uninterrupted 24x7 use with true hot-swappable batteries

Fast, accurate integrated barcode scanner

Durable design to resist dust, shock and liquid agents

Enterprise-grade security to minimize compliance risks

Unified email, text, voice and web-based communications across your hospital environment

Spectralink Versity helps your clinical teams:

IMPROVE PATIENT CARE

- ➔ Coordinate patient care across a wide array of care team members
- ➔ Gain real-time access to patient information such as vital signs, dietary needs, medication information, and pain scores
- ➔ Enable HIPAA-compliant secure text messages when exchanging sensitive patient information

INCREASE PATIENT SATISFACTION

- ➔ Update patient information at the point of care, and spend more valued time with the patients
- ➔ Respond faster and more efficiently to critical alerts
- ➔ Access lab results for faster diagnostics and care

OPTIMIZE WORKFLOWS

- ➔ Get the right information instantly with access to clinical applications and systems
- ➔ Improve staff visibility and connectivity
- ➔ Centralize alerts and notifications

Together, Spok and Spectralink provide a comprehensive solution that enables care teams to communicate quickly and securely and creates an enterprise-wide approach to the management, prioritization, and response to key patient events.
