

SPOK® AND ZEBRA®

MESSAGING MADE EASIER

Spok delivers clinical information to care teams when and where it matters most to improve patient outcomes. More than 2,200 hospitals use Spok Care Connect® solutions, including all of the organizations on the *U.S. News & World Report* Best Hospitals Honor Roll. They rely on Spok every day to support workflows that speed care team interaction, communicate test results, coordinate response, and improve patient satisfaction.

Zebra is a leader in patient identity, mobile healthcare, and real-time locating and tracking. Zebra healthcare technology solutions are purpose-built for healthcare, and connect medical providers to patient records, caregivers to colleagues, and patients to practitioners for better care and better outcomes.

ENABLING TIMELY COMMUNICATIONS AND FAST RESPONSE

Spok can provide healthcare leaders with the durable and reliable Zebra mobile computer devices designed specifically for the industry. The usefulness of these communication devices can be enhanced even further with Spok software. Through Spok and Zebra's partnership, critical information and updates from your staff and alert systems, such as nurse call, patient monitoring, and many others, can be sent to staff on their Zebra communication devices. Ultimately, being able to reach team members within seconds of a critical alert improves overall workflow, staff productivity, and the comfort and safety of everyone in your facility.

Deliver Clinical Alerts

Combining Spok's clinical alerting solutions with Zebra devices creates an enterprise-wide approach to the response to and management and prioritization of key events. This includes the ability to deliver clinical alerts from your various hospital systems to the right people based on your predetermined rules, including escalated communications whenever necessary. Sources of information can include nurse call, patient monitoring, bed management, EHR, lab, radiology, security, and infant protection systems, among others.

Clinical alerting solutions from Spok support messaging integration with the Zebra TC51/TC56 and MC40 series devices.

Communicate Securely

Together, Spok and Zebra also provide a comprehensive solution which enables hospital staff to send mobile messages securely. The Zebra TC51/TC56, and MC40 series are supported devices of the Spok Mobile® HIPAA-compliant secure texting application.

Spok Mobile offers full integration with the entire hospital directory and latest on-call schedules. This allows fast, accurate connections with other staff members, which in turn enables the hospital to provide better and faster patient care.
